CHAS. E. SMALL.
 FRED A. CURRIER,
 J. P. WILLARD.
 Auditors

TO THE LEGAL VOTERS IN THE TOWN OF BELMONT.

Another year has passed, and, in keeping with a long-continued custom, and in obedience to the law of the state, we respectfully report to you our acts as your servants, and put before you such information as will enable you to judge of the work done in our schools, their present standing, and their needs for coming year.

We have placed adjustable desks and chairs in the Union school house according to the vote which was taken in your last school-meeting. It is now a very pleasant and inviting school room, and a credit to the community in which it is situated. Two coats of paint have been put upon the Plumer school buildings, which has greatly improved its appearance to people who pass by it. All your school buildings are in a good condition excepting the Ladd Hill house. We would simply suggest that an out-building is much needed at the Union, to avoid disease.

Our schools have been in session 34 weeks, which was divided into 3 terms, making it the longest school year the town has ever had. We trust the good citizens of the town will determine that such a school year shall be maintained in the future.

In harmony with the suggestion made in our last report we have taken steps to give the schools in the village some instruction in vocal music—all which we felt at liberty to do without an especial appropriation. We did not consider it advisable to engage a professional teacher in consequence of the expense which such a course would necessitate. After giving the subject a somewhat careful consideration we engaged Miss Kimball of the Intermediate school to give instruction in that branch in the three lower departments. A small addition was made to her regular salary to compensate her for the expense she incurred in taking lessons. This new branch has given excellent satisfaction and has been a great help to the schools. We are sanguine that it has created a decided enthusiasm among the scholars. It will be continued the coming year. Miss Kimball has shown herself a good instructor in the rudiments of music as she has been an excellent teacher in all the branches which are taught in her department.

Schools have been maintained in the usual places and it has been the intention and purpose of your School Board to put competent and effective teachers in all of them without the slightest discrimination because of location, or the number of pupils. Some

of our best teachers have had charge of our smallest schools. Nearly all of our schools have been efficient and successful and the most of them have shown a remarkable advancement. We are confident that our schools equal those of any other town or city in Belknap county. When age for age and grade for grade are considered, we are willing to compare them with schools in any town in the state. We have little to say in regard to any failure, but would intimate that in some respects the school which gave such satisfaction to the people was very far from satisfying your School Board. We regret the necessity of reporting disturbance and discord in one school which resulted from insubordination and bad conduct on the part of a few scholars, when the school has had as its teacher one of the best educators in the state and one who was in all respects fully and thoroughly qualified for the position. It is to be hoped that those who are guilty of having done wrong will see their folly and do better in the future. A lawless and disorderly deportment in the school room generally indicates the same elsewhere. It hurts those who are guilty, injures the school, and gives an ill name to the whole community, even when the people at large condemn the lawlessness and rebellion.

The extremely cold weather and the prevalence of bad colds and kindred diseases have seriously interfered with the attendance of scholars during the winter term. This has been especially true in connection with the two Primary schools in the village. Of course it is a matter to be regretted but one which could not be avoided, at least a greater part of it was unavoidable, being being beyond the control of officers or law. So many absentees during the winter must seriously interfere with the work of those departments during the spring term and make the labor of the teachers much harder. It presents a serious question. We see no excuse for the great number of instances of tardiness in some of the schools. You will notice the unusual number of 127 in the Grammar school during a term of twelve weeks, while the 1st Primary school, with nearly double the number of pupils, all of whom were of a tender age, showed only 15 cases, or less than one-eighth as many. So a careful observer who takes all the connecting items into consideration a large part of the blame should be borne by some one besides the scholars. To our minds this is a matter which should receive careful attention from parents and all others.

A set of by-laws will be presented for your consideration at the coming school-meeting. We trust they will be adopted and then enforced so as to cause a more regular attendance in all our schools.

We sincerely regret the loss of Mr. Joseph Plumer from the School Board and from the town. His work in connection with our schools has been productive of much good and his going from our midst deprives us of his wise counsel and earnest helpfulness.

All good citizens will feel a keen satisfaction in knowing that their schools receive the notice and commendation of intelligent men and women who visit the town, and it is their privilege to see that no retrogression is allowed in them. The schools should be made more effective and placed upon a higher plain. It is our duty to see that they are modernized and kept so. The utensils used by our fathers in past generations in cultivating their farms and in carrying forward their industries, although they served their purpose in the absence of something better, are universally discarded to-day. Better implements and superior methods are adopted by a progressive age. We think it is a matter of wisdom and policy to pursue a similar course in cultivating and developing the minds and intellectual faculties of our boys and girls. The crude methods of our ancestors, which did not and could not produce desired results, are rightfully discarded by all educators in favor of those which use and experience have shown to be superior in their workings and productive of greater advancement. In this age of rush, when children, in a vast majority of cases, leave school at an early age, those methods by which they can acquire the greatest possible amount of practical education should be permanently adopted and rigidly followed although some may criticise and object to them. It is our purpose thus to do. We trust the coming year may be one of unusual prosperity and progress.

We refer to the annexed statistical table for other information. It is in a measure defective as some of the schools are still in session.

Thanking all with whom we have had business or official relations for courtesies received we submit this report for your consideration.

F. A. CURRIER,
E. S. MOULTON.
School Board.
